EDUCATION

Master's Degree

Applied Mathematics | GPA: 3.75

📍 Cal Poly Pomona
Aug 2020 - Dec 2022

Bachelor's Degree

Applied Mathematics | GPA: 3.10

📍 Cal Poly Pomona
Sep 2016 - May 2020

EXPERIENCE

BI Manager

Temco Logistics

📍 Marysville, Washington
Feb 2025 - Present

Managed a team of BI & ML experts where we develop applications and dashboards that drive business outcomes and enhance operational efficiency.

- **Cloud Architecture Migration:** Led a cross-functional team to implement a new cloud architecture to ensure scalability, security, and simplify 3rd-party integrations.

Hub-&-Spoke | Role-Based Access | VPN | Load Balancing

- **Machine Learning:** Mentored a team of ML Developers in creating business solutions using Machine Learning for optimizing logistical operations, detecting anomalies within text & financial data, and forecasting workload. **Python | Scikit-Learn | Tensorflow | Azure | Databricks**

- **Data Governance:** Leveraged Role-Based access for developing a solution to personalize reports and applications according to the user's position improving security and user experience.

BI Automation & ML Lead

Temco Logistics

📍 Marysville, Washington
Apr 2024 - Jan 2025

Led initiatives to implement automated reporting and machine learning-driven analytics, providing actionable insights that drove business growth.

- **AI Solutions:** Trained a series of models for improving employee retention, data accuracy, and workload forecasting. Utilized pre-built models that enhanced data governance, delivery tracking, and extracted information from PDFs & images. **Python | Scikit-Learn | Tensorflow | Azure**

- **Scalable Applications:** Upgraded legacy applications to utilize the latest technology and migrate infrastructure to the cloud, ensuring scalability and reliability. **Azure | Databricks**

- **Optimization:** Led projects and BI developers to implement concurrent processing and ensure current data pipelines would expand with the company's growth.

Python | Go | Rust | SQL | Databricks | Azure

BI Developer

Temco Logistics

📍 Pomona, California
Mar 2023 - Mar 2024

Developed applications to process data flowing from various sources and created dashboards to display insights for leaders to utilize when making strategic business decisions.

- **DB Management:** Designed and implemented schemas for databases to ensure data normalization, scalability, and efficient query speeds. **MySQL | Lucidchart | ERD**

- **Data Pipelines:** Developed and maintained robust data pipelines to automate the ETL of data from multiple sources into the data warehouse. **Python | JS | SQL | Power Automate | Azure | Domo**

- **Data Visualizations:** Designed and developed interactive dashboards and data visualizations using Domo to support business decision-making and performance tracking.
